

1. Print the cut-out. I recommend using some kind of card stock
2. Cut the outside lines, and remove from the rest of the paper. Do not cut anything other than the outside lines.
3. Score the fold lines and make the folds.
4. Cut out the inside lines. It is important to do this after making the folds.
5. Fold and glue the top and side flaps, leaving the bottom flap open.
6. Insert iPhone and fold in bottom flap
